

FCCU upgrades

The FCCU is the 'heart' of your refinery and in an ever-changing market environment it will be placed under increasing demand to meet rising expectations in terms of capacity and environmental constraints, whilst at the same time maintaining exemplary operational reliability. Ledwood is an FCCU upgrade specialist and has experience in many refineries across Europe.

FCCU Upgrades – Ledwood is exceptionally well equipped to plan, engineer and execute the complete FCCU upgrade able to take conceptual licensor design and converting it efficiently and safely into reality in a highly integrated project environment.

By executing the fabrication/final assembly of all major vessel components (including complete heads) in its own workshops Ledwood retains an extremely close control over the construction schedule and is consequently often able to offer delivery within a much shorter time-frame than might otherwise be expected.

- ✓ Detailed planning and Preparation
- ✓ Engineering
- ✓ Procurement of proprietary equipment
- ✓ Pre-fabrication (inhouse) of new vessel components, pipe work, structural steelwork etc.
- ✓ Logistics and shipping
- ✓ Placement of specialist sub contracts
- ✓ On-site installation
