

Fired Heater Fabrication and Erection

Ledwood is one of the UK's largest fabricators and installers of Process Fired Heaters and Furnaces. Units of up to 200 tonnes can be constructed and tested in the company's workshops. Ledwood have supplied in excess of 300 heaters globally over the past twenty-five years.

Ledwood is able to offer clients a full range of supply options for their heaters, from 'piece small' components to complete modular assembly. The service includes detail design, structural steelwork, refractory lining, process coil (in any metallurgy), maintenance, site construction, E&I and ancillary piping.
