

Turnarounds

Ledwood offers a comprehensive planning, preparation and execution service for Turnaround activities often acting in the Managing Contractor role. In the detailed planning phase Ledwood calls upon its extensive experience of Turnaround events to make an informed provision for un-scheduled emergent work and are able to put its own engineering/fabrication workshops on 24 hour stand-by.

This precaution can potentially be the saviour of the schedule as Ledwood has a proven ability to procure, fabricate and deliver otherwise unobtainable and urgently needed replacement components within a very short time-frame.

- ✓ Detailed planning and Preparation
- ✓ Engineering/Managing Contractor
- ✓ Procurement of proprietary equipment
- ✓ Pre-fabrication (inhouse) of new vessel components, pipe work, structural steelwork etc.
- ✓ Logistics and shipping
- ✓ Placement of specialist sub contracts
- ✓ On-site installation
